

A List of Accepted Bromeliaceae Names
by *Eric J. Gouda and Derek Butcher*

INTRODUCTION

This list is not a corrected or edited list of the 'Alphabetical list of Bromeliad Binomials' created by the late Harry Luther, and published every two years by the Marie Selby Botanical Gardens and the Bromeliad Society International, in 14 editions up till September 2014.

The intention of the list is similar and the layout has been maintained in this document but there can be differences based on interpretation and opinion. The list is current up till today and can be printed to a PDF file or printer directly. The print date **10-10-2016** will be included in the document.

This list (first version: Summer 2016) is based on the database used for the '[Encyclopaedia of Bromeliads](#)' and is updated on a daily basis. It should be referenced to as follows:

Gouda, E.J. & Butcher, D. (cont. updated) *A List of Accepted Bromeliaceae Names* [<http://bromNames.florapix.nl>]. University Botanic Gardens, Utrecht (*accessed: 10-10-2016*).

On the next page the Genera are listed with the number of accepted species names.

How can you use the list:

- Just to check the spelling of a Name and or Author abbreviations
- Check if a name is a currently accepted name
- Check how many species are accepted for each genus and to which subfamily it belongs (next page)
- You can use it online or print it (it is formatted for Letter page size)

A full list of all *Bromeliaceae* names, including synonyms, can be found at <http://taxonlist.florapix.nl/>
