

BROMELIACEAE

Bromeliads are marvelous house plants, provide accents for tropical gardens, and are of great horticultural importance to all owners of ornamental greenhouses. They are extremely attractive, whether or not in flower. They are easy plants to grow.

For detailed information write for "BROMELIADS" — A cultural handbook, obtainable from The Bromeliad Society, 647 South Saltair Ave., Los Angeles, Calif. 90049, U.S.A.

Our Bromeliad Collection is probably the most complete in the world. For sale, at this time, are only the species mentioned below. Many others, including several unnamed novelties, will be offered in the next catalogues.

SEEDS: — Bromeliad seeds only germinate well if they are not older than 3 to 4 months. We mention below the approximate ripening time season of the most of the seeds we offer. We cannot accept orders for smaller quantities than listed.
